CBD for Natural Wellness

-The Endocannabinoid System

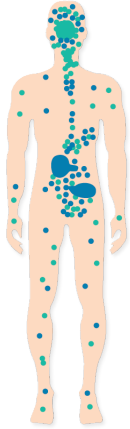

Discovered in the early 1990's, the Endocannabinoid System (ECS) has been identified as the body's natural way to help you achieve balance for optimal function.

Activating your ECS has been shown to have numerous "de-stressing" benefits for improving mood, sleep, relaxation, inflammation and many other outcomes which are currently being studied.

Endocannabinoid

AEA

Molecule produced by your body to regulate the ECS in order to achieve homeostasis (balance).

Phytocannabinoid

CBD

Non-psychoactive molecule found in plants such as hemp which closely mimics endocannabinoids.

Activate your ECS to improve your well-being through healthy practices such as:

- Moderate to High Intensity Exercise
- Massage & Stretching
- Meditation & Relaxation
- Healthy Diet
- Using Phyto (Plant) Cannabinoids such as **CBD**

Sombra**PLUS**.com

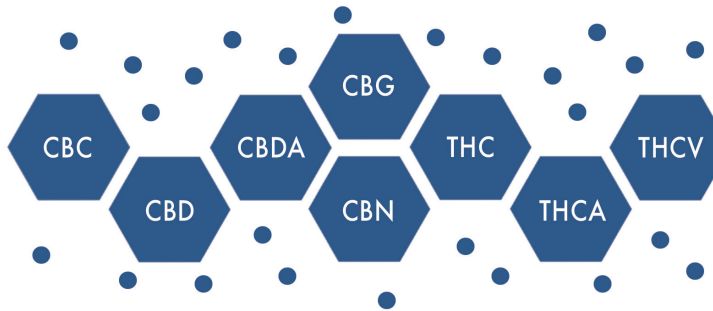

Sombra®, from the company you have grown to trust since 1974, is proud to introduce Sombra® **PLUS CBD** Pain Relieving Gel. Our regionally-grown, hemp-infused products harness the natural power of our pain relieving topicals with responsibly sourced **CBD**. To achieve the best clinical outcome Sombra® **PLUS CBD** delivers **consistent** dosing for **predictable** results.

FULL SPECTRUM vs CBD ISOLATE

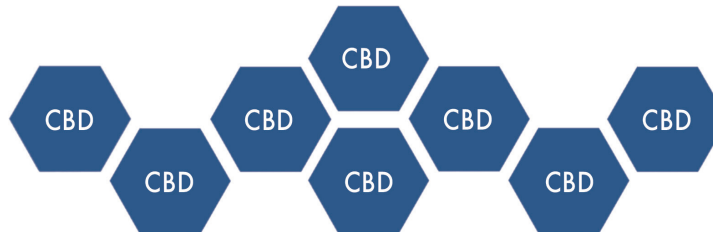

There are different cannabinoid spectrum options to choose from, such as full-spectrum and **isolate**. While different types of **CBD** products may sound similar, there are significant differences.

FULL SPECTRUM (Everything from source plant)

A full-spectrum **CBD** product uses dried hemp plant matter to extract cannabinoids. Full-spectrum **CBD** oil that contains all the cannabinoids that hemp has to offer in inconsistent percentages, and may cause entourage side effects.

Sombra® **CBD ISOLATE** (Only CBD)

CBD Isolate is made from carefully filtered hemp plant extract that is obtained with supercritical CO2 extraction method. This allows us to produce the **cleanest and purest product available on the market.**

Sombra® PLUS CBD Pain Relieving Gels are developed, manufactured, and packaged in the USA.
