

**Notice Type**

Manufacturing Change Notification

Effective Date

January 19, 2026

Reason for Update

Due to a temporary supply shortage of the botanical ingredient Queen of the Prairie (Filipendula Ulmaria), a minor formula adjustment has been implemented for select products.

Description of Change

During this temporary period, Queen of the Prairie has been substituted with Glycerin in the finished product formulas listed below. This substitution is being used solely to maintain product availability and manufacturing continuity.

Affected Products

Warm Pain Relief

Warm Pain Relief + CBD

Cool Pain Relief

Cool Pain Relief + CBD

Impacted Manufacturing Lots

Warm Pain Relief – Lot 1603

Impact Assessment

This temporary ingredient substitution does not affect the finished product specifications, safety, performance, effectiveness, or overall quality. All products continue to meet internal quality standards and applicable regulatory requirements.

No changes have been made to product use directions, warnings, or intended use.

Duration of Change

This is a temporary adjustment. The original formula will be reinstated once the Queen of the Prairie ingredient becomes available.
